

# Bluetooth

<https://kofler.info/bluetooth-konfiguration-im-terminal-mit-bluetoothctl/>

bluetoothctl

Debugging (root)

```
sudo btmon sudo btmon -write ~/hcitrace.snoop | tee ~/hcitrace.txt
```

Script

The bt-collect-logs.sh script available here: <https://github.com/bergotorino/bt-debugging-tools> can automatically fetch, pack and pull the logs from the device.
