

Obsbot - Gestensteuerung

Use Tail

Power Gesture

OBSBOT Tail has first of its kind implementation of power gesture in AI video shooting, empowering users to access a series of functions such as start recording, tracking, zoom and creative camera movements with natural simple gestures. Go to settings tab to enable or disable the gestures function.

OBSBOT Tail can recognize gestures made near your face around 2 seconds and then camera indicator light will turn blue, indicates successfully performed gesture.

 Gestures for user-defined functions

- Start/Stop: 
- Select Target/Cancel Target: 
- Lens Lock (default): 
- Zoom Control (default): 
- Crazy Time (default):
